RAÚL RODRÍGUEZ TROTONDA

GRAPHICS PROGRAMMER

+34 662 656 663 | raulrodriguez.job@gmail.com | Gavà, 08850, Barcelona, Spain

ABOUT ME

I'm a **Software Engineering graduate** passionate about game development and programming. I'm particularly interested in **graphics programming** and **real-time rendering**, while also enjoying **gameplay programming**. I have particular experience with C++, DirectX 12, HLSL, PIX, and Unity, as well as other programming languages and technologies. I'm motivated by continuous **learning** and tackling new **technical challenges**.

SKILLS

- C++
- DirectX 12
- HLSL
- PIX
- C#
- Unity
- Unreal Engine
- Java
- Python

EDUCATION

Master's Degree in Advanced Programming for AAA Video Games

UPC Barcelona | 2025 - 2026

- Development of a custom Game Engine with C++ and DirectX 12.

Bachelor's degree in Software Development Engineering

Immune Technology Institute | 2021 - 2024

- Developed a social game in **Android Studio** with a custom Hadoop-inspired **ad-targeting algorithm**, alongside a classmate.
- Built a technical prototype of a **MMORPG leveling system** using Unity alongside a classmate.

Higher Technician Diploma in 3D Animation, Games and Interactive Environments

Obicex | 2019 - 2021

- Developed multiple games across different genres using Unity, both independently and alongside classmates.

EXPERIENCE

2024 - 2026 **ADEPT SYSTEM MANAGEMENT**

FULLSTACK WEB PROGRAMMER

- Worked with a **small team** to **create** and **maintain** custom ERP tools.
- Provided **support** to clients with ERP-related questions and issues.

2023 - 2023 **VOTTUN**

INTERNSHIP AS UNITY DEVELOPER

- Developed an **SDK** to integrate blockchain technology into **Unity**.
- Developed a technical demo to showcase the blockchain SDK.

2022 - 2022 **IMMUNE TECHNOLOGY INSTITUTE**

UNREAL ENGINE 4 TEACHER

- **Teacher** at a summer camp for children.
- Assisted students with **technical questions** and **issues.**

2021 - 2021 **TETRAVOL**

INTERNSHIP AS GAMEPLAY PROGRAMMER

- Developed an app combining **augmented reality** and **virtual reality** using Unity and ARCore.
- Used **Unity Networking** to connect VR headsets with Android devices.

PROJECTS

CUSTOM RENDERING ENGINE | C++, DirectX 12, HLSL

PERSONAL PROJECT

- Building a custom **real-time rendering engine** using **DirectX 12**.
- Developing **technical demos** to explore rendering techniques and build a graphics programming portfolio.

DIRECTX 12 GAME ENGINE | C++, DirectX 12, HLSL

Master's Degree - TEAM PROJECT | Ravenwhisp - Bound by Death

- Developed a **game engine** from scratch using **DirectX 12** as part of a **18-person team** and developed a small game on it.
- Built the **PBR** pipeline and the **IBL** system, implemented **Deferred Rendering**, created various visual effects and implemented them in gameplay.

LANGUAGES

- Spanish
- English
- Catalan
